AFFIDAVIT OF JAMES POCKET

Made Under Penalty of Perjury and in the Interest of Lawful Remedy

I, James Pocket, being of lawful age and sound mind, and acting wholly without legal representation but with full liability for my words and actions, do hereby solemnly declare and attest the following facts to be true, correct, and made in good faith, to the best of my knowledge, belief, and understanding:

I. Statement of Identity and Purpose

1. I am a living man domiciled in the state of Georgia, appearing in my natural capacity, without corporate status or assumption of agency benefit.

2. I make this affidavit in support of my Private Right of Action, my lawful and equitable claim to standing, and my request for immediate recognition of injury and remedy, as described in the accompanying declaration.

3. I submit this affidavit as a formal notice of the conditions under which I have lived, acted, and attempted to be heard by those charged with lawful authority.

II. Conditions of Duress & Endurance

4. I have lived the majority of my adult life under prolonged, systemic duress - legal, social, psychological, and economic - originating from my first entanglement with the court system nearly three decades ago.

5. Since that time, I have endured what I can only describe as the chronic consequences of a system designed to marginalize individuals, not simply through overt punishment, but through sustained disqualification from full participation in society.

6. My Social Security Earnings Summary, medical records, employment history, and public documentation affirm a near-complete paralysis of economic opportunity corresponding directly with each administrative or criminal action taken against me. This pattern is not abstract; it is visible in measurable, verifiable time-stamped data.

7. The emotional and social cost of early legal trauma - broadcast publicly and cemented in the memory of my community - has shaped nearly every relationship, employment opportunity, and psychological threshold I

have encountered since.

8. While physical and neurological consequences have occurred, I do not seek to reduce my experience to a diagnosis or medical event. I do not ask for sympathy. I state only that I am here now, upright and speaking clearly, despite everything that statistically, structurally, and spiritually suggested I should not be.

9. I do not act as a victim. I act as a man who has survived systemic erasure long enough to testify - with dignity intact - and with the clear understanding that my continued existence is not a petition, but a fact that must now be lawfully acknowledged.

III. Efforts to Seek Remedy

10. I have repeatedly attempted to communicate with lawful authorities through proper channels.

11. In response, I have been subjected to administrative delay, legal uncertainty, shifting standards, and in some cases, outright dismissal without engagement on the merits.

12. These denials have occurred despite clear evidence of harm, lawfulness of intent, and documented requests for peaceful remedy.

13. I have prepared and now submit a Declaration of Private Right, asserting my constitutional, equitable, and unalienable rights to be heard, to obtain remedy, and to assert standing.

IV. Good Faith and Intentions

14. I submit this affidavit in honor and peace, and not as a threat, challenge to jurisdiction, or refusal of lawful authority.

15. I do not act on behalf of any movement, party, or ideology, but as a single human being attempting to reconcile his life with the law.

16. I ask only that my efforts be treated with the dignity, urgency, and respect due any person seeking lawful recourse for injury suffered in silence.

V. Oath and Verification

I swear under penalty of perjury, under the laws of the United States of America and the State of Georgia, that

the foregoing is true and correct, that it is made without intent to deceive or obstruct, and that all attachments to this affidavit are submitted in good faith.

Executed this ___ day of _____, 2025.
